The 2006 Advanced Course in European Union Legal Practice is offered jointly by the Department of Legal Studies and Summer University of Central European University (CEU), in cooperation with the Total Law™ Team. The program brings together participants from all over the world and from diverse legal backgrounds, i.e. law students near completion of their law degree, law graduates and legal professionals, who are seeking further credentials and experience in the field. It may be particularly appealing to government officials and those aiming at a career in national, international and/or European civil service, and those who wish to apply for jobs in the field of European Union law. The working language of the course is English.

Central European University is a US-style, internationally recognized institution of post-graduate education in the social sciences and humanities, located in the capital city of Hungary, Budapest. Incorporated in the State of New York, CEU is accredited by the Commission on Higher Education of the Middle States Association of Colleges and Schools (in the United States) and by the Hungarian Ministry of Education.

Participants have two enrollment options. Either they opt for the Diploma option, which requires them to register for and pass an examination at the end of the course, and entitles them to receive a course Diploma and CEU academic credits. Or they opt for the Certificate option, which entitles them to receive a Certificate of Participation, provided that they meet the course requirements. For further information on the enrollment options, go to [Enrollment Options](#).

Participants who have not studied European Union Law are *required* to enroll in an Introductory Course, which will be organized from June 26—June 30, 2006. This course is also open to participants who wish to update their knowledge in European Union Law.

The advanced course will also enroll a number of CEU LLM students. CEU students have the possibility to enroll in the summer course in two ways. Either they register as external participants, and are subject to the above requirements and options, or they register with the Department of Legal

Studies, opting for the LLM with Specialization in European Union Law, which requires them to complete successfully 8 EU related credits, i.e. 4 CEU Legal Studies Department credits *and* 4 Total Law™ summer course credits.

### **Course Description:**

This *advanced course* is about the practice of European Union Law. Participants receive hands-on insider analysis about the functioning of the European Union. The program is designed to combine seminars on different subjects as well as workshops supporting the topic addressed in these seminars or some aspects thereof.

The Total Law™ teaching team is a unique blend of well-known academics and senior officials working in European Union institutions, who have also written widely in the field. The particular composition of the team gives the seminar and the workshop both that advanced knowledge and the insider view that is so valuable for the participants.

### **The Total Law™ Method:**

The Total Law™ approach, developed by the Jean Monnet Center at the New York University School of Law, believes in contextualization: situating a legal controversy, a court decision, a Treaty provision, a Directive or a Regulation in its economic, social and political context. The aim is not to make participants amateur economists or political scientists, but rather to give them "another perspective" on the problem. The course will improve the participants' skills by explaining how economic, social and political contexts shape the particular legal problem addressed and impact the thinking about its legal solution. The program will equip participants with the ability to understand the economic, social and political consequences of different legal outcomes. The discipline is Law. The focus is Law. But the premise is that Law cannot be understood, nor practiced professionally and competently, without understanding its broader contexts.

In addition to seminars and workshop, the program includes social and cultural activities, such as various thematic evenings with members of the Total Law™ team (e.g. evening in a typical *kert* bar, wine tasting, karaoke in an Irish pub, or lunch in a traditional *vendeglő*), a visit to the Hungarian Constitutional Court or the Hungarian Parliament, a boat trip to picturesque Szentendre followed by a picnic, a cultural walking tour of Budapest, etc.

The Total Law™ approach was designed jointly by all members of the team so as to make the parts fit into a coherent whole and to ensure that the different methodological and intellectual approaches practiced in the course all add up so that the whole is greater than the parts. This approach is also used at other universities worldwide.
