

UNITED NATIONS INDUSTRIAL DEVELOPMENT ORGANIZATION

Ludovico Alcorta is the Director of UNIDO's Development Policy, Statistics and Research Branch (DPR). As branch director he leads a team responsible for collecting and compiling statistics for use by member states and research community, providing evidence-based understanding of the role of industrialization on sustainable development, developing industrial policy recommendations for countries and regions based on solid empirical research findings, disseminating, promoting, transferring and expanding UNIDO's knowledge base.

Prior to this, he served as a Professor in Economics of technology and Innovation and Associate Dean for Research at Maastricht School of Management. He was a Research Fellow at the Institute for New Technologies, United Nations University and worked as Economist for Latin America at the Economist Intelligence Unit and Midland Bank (part of the HSBC group). He has performed consultancy work for the United Nations' Conference on Trade and Development (UNCTAD) and for UN's Economic Commission for Latin America and the Caribbean (ECLAC). Ludo is also an Affiliated Professor at the Dusseldorf Business School, Universidad Católica del Peru in Lima and University of Maastricht. Ludo has published extensively in the areas of new technologies, innovation and development including in journals such as World Development, European Journal of Development Research, Research Policy, Industry and Innovation as well as in China's Economic Research Journal. Dr. Alcorta holds a Bachelor and Master in Economics from Universidad del Pacífico, Lima, as well as a Master of Philosophy in Development Studies and a PhD both from the University of Sussex, Brighton, UK.
